

## DEPOSITIT C360 INSTALLATION INSTRUCTIONS FOR MAC

### **\*\* INSTRUCTIONS FOR APPLE MAC - VERY IMPORTANT \*\***

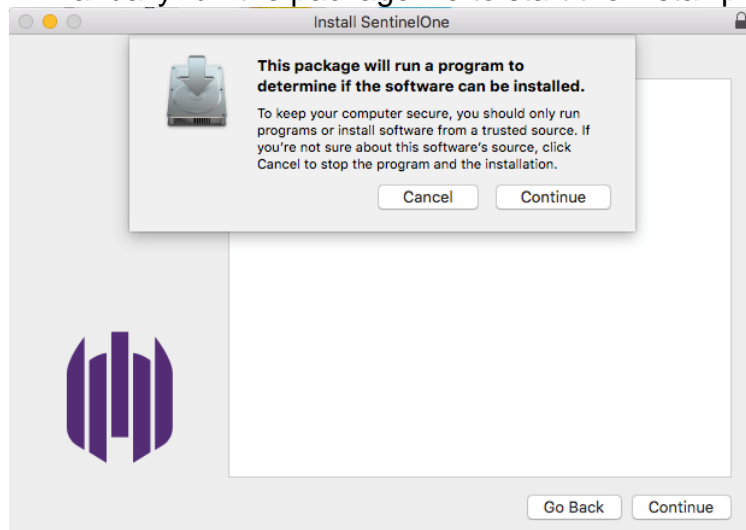

- Minimum operating system requirement is 10.11
- We recommend you always install the latest operating system updates for your MAC.
- Whatever version you are using (10.11 upwards) you must [CONTACT US](#) and let us know what operating system you are using and we will send you the correct version of Depositit C360 to install. Failure to do this may cause a conflict with your machine which Depositit will not be held responsible for.

### Installing the agent

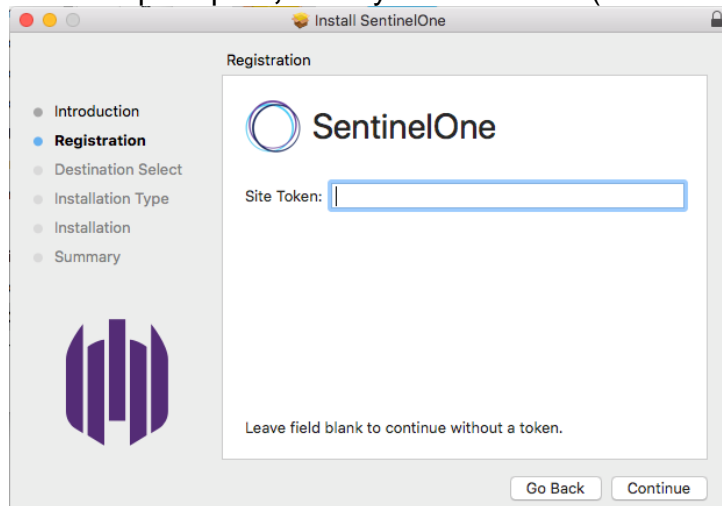

1. Copy & Paste the following link in to your web browser:

-the live LINK will be available for you shortly-

2. Manually run the package file to start the install process.

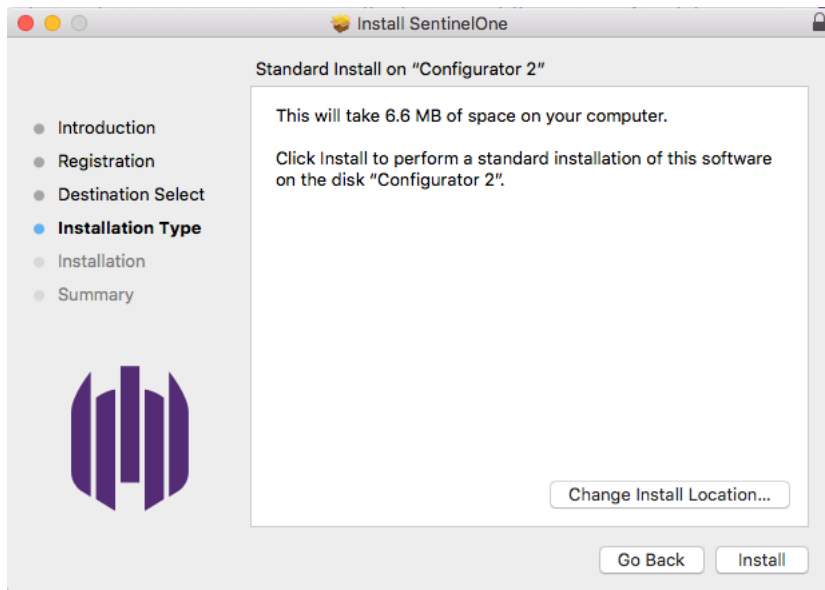

3. When prompted, enter your site token (found in your Welcome email).

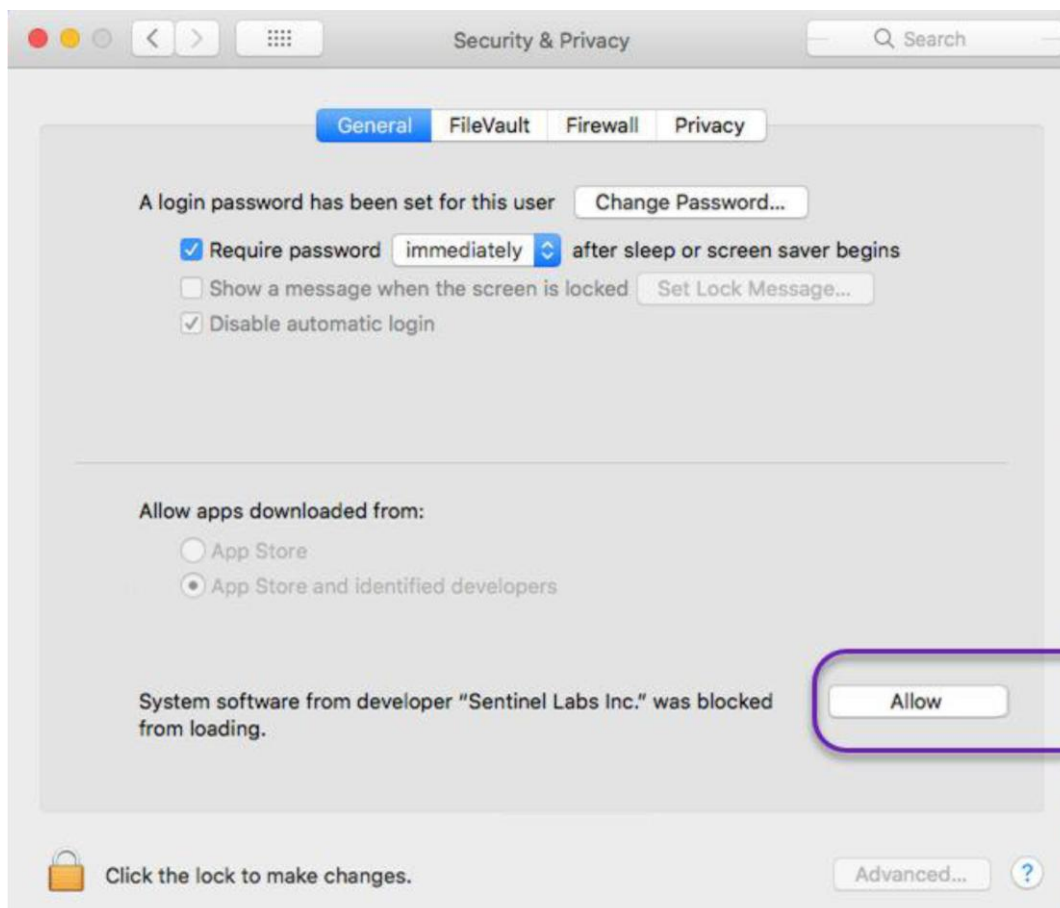

4. The installer will confirm the size of the install and you should select 'Install'.

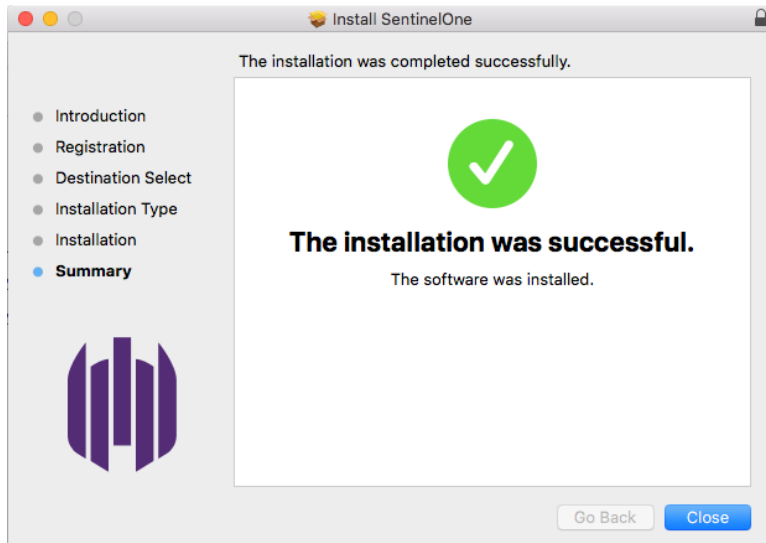

5. The installation will proceed. During the install, if you see the System Extension Blocked message, click OK. Open System Preferences and click Security & Privacy. A message will say "System software from developer "Sentinel Labs Inc." was blocked from loading". **Click "Allow"**.

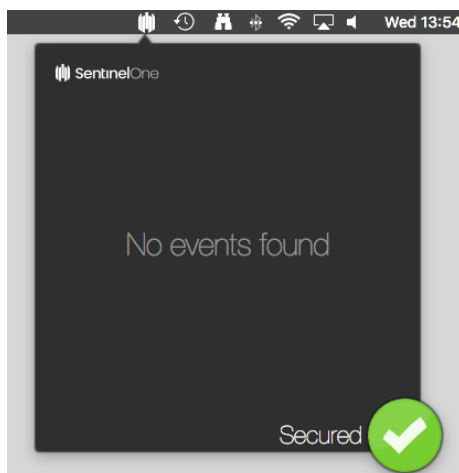

6. Once completed, the installer will show the installation is successful and the agent will start running.

7. The SentinelOne icon will appear on the menu bar at the top. Clicking on the icon will show the agent status monitor.

**Once your machines have the agent installed, they are fully monitored by our support team allowing us to respond to any alerts that are generated. If any threats are detected, we will email you a report outlining the threat and the steps taken to remediate.**
